

Adjustable attenuator for pin tubes

Overview

The PIN tube has the characteristics of low on-resistance, high off-resistance, and small capacitance between electrodes. So generally it can be used as SWITCH, and the design of adjustable attenuator; Manufacturers such as skyworks, Rohm, and nxp all sell PIN tubes. Now use the PIN tube that comes. Analog Devices' RF attenuators are available in a broad range of architectures and form factors, giving designers the flexibility to select a part that best aligns with their system requirements. Add article to the Resources section of myAnalog, to an existing project or to a new project. Over 300 models for virtually any application from DC up to 40 GHz! Max. Featuring wide bandwidth, precise attenuation control, and low insertion loss, NEDITEK's PIN attenuators deliver reliable RF signal conditioning for high-frequency communication systems. ensuring stable supply and consistent performance. ttenuator with a low impedance driver circuit to significantly decrea the rise and fall times.
