

Are there any fiber optic cables in this wasteland

Overview

Footage released by the drone battalion of Ukraine's 63rd Separate Mechanized Brigade on December 19, 2025, reveals an extraordinary scene in Lyman, where streets, courtyards, and open spaces are draped in slender cables resembling a giant spider's web. A Ukrainian front-line city has been smothered by a giant web of fibre optic cable from hundreds of drone battles in the skies. Video footage of Lyman, Donetsk, shows entire rows of houses and a field draped in sheets of translucent wire left behind by the aircraft. Fitted with a spool of barely. Installation, use, and maintenance of two 2-inch-diameter subsea fiber optic cables buried 3 to 6 feet and two 8-inch-diameter high-density polyethylene conduits installed 6. 5 to 66 feet under the San Francisco Bay. These networks enable internet access, support financial markets, and connect billions of people worldwide.
