

Automatic equipment for tray-type cable trays

Overview

A cable tray making machine, also known as a cable tray roll former, is an automated machine that forms metal coil strips into cable tray sections through a series of progressive dies and bending operations. The high-speed automatic cable tray production line is composed of an uncoiler, a leveling machine, a rotating laser cutting machine, a press brake rolling push feeding mechanism, a fully automatic CNC press brake, and a stacking robot. Our production line is equipped with intelligent punching, roll forming and. A cable tray system used to support insulated electrical cables used for power distribution control and communication as an alternative to open wiring or electrical conduit systems. In addition, Cable tray systems are the right solution for running large quantities of data cables overhead or. The cable tray making machine is an advanced production line designed for trough-type cable trays. This machine is equipped with a PLC.
