

Barbados EPON device 10G

Overview

This is a 10G-class access system that provides a multi-access service infrastructure, achieving higher bandwidth, higher reliability, and new functionality (time synchronization functions, sleep functions). It is expected to increase revenue by expanding its application to cover. Cisco's family of 10-Gbps symmetrical passive optical network (XGS-PON) Optical Network Terminals (ONTs) delivers flexible, high-performance broadband connectivity for a wide range of fiber-to-the-premises use cases, including residential spaces, Multidwelling Units (MDUs), Small Office/Home Office. The 10G-EPON system can reduce CAPEX/OPEX through effective use of existing equipment, multiple branching, and large capacity. These devices are built using modern design principles. With a pure Ethernet. Home Products and Solutions InterConnect Switches Products AON Network AON Ethernet H3C ET900 Series 10G PON ONU ET900 series 10G PON ONU devices are corridor-side equipment for the H3C FTTB solution. ET900 series can be installed indoors and feature a built-in high-performance Gigabit Ethernet. Shop the ZTE ZXA10 C320 EPON, GPON OLT with 10GE uplink board SMXA3 and 8-ports card at Ubuy Barbados, the global online store. Get fast and reliable shipping worldwide. The standard supports two configurations: symmetric, operating at 10 Gbit/s data rate in both directions, and asymmetric, operating.
