

Branch Bridge

Overview

The Branch Bridge is a groundbreaking example of sustainable urban bridge architecture, inspired by the dramatic meeting of the Baltic Sea and the North Sea at Skagen, Grenen — a rare natural phenomenon in Denmark. Known locally as "the branch" due to its long and narrow landform, this unique. A bridge circuit is a topology of electrical circuitry in which two circuit branches (usually in parallel with each other) are "bridged" by a third branch connected between the first two branches at some intermediate point along them. The bridge was originally developed for laboratory measurement.
