

Burundi Fiber Optic Transmission

Overview

BBS runs Burundi's national fibre-optic backbone. It provides IP transit and reliable broadband links for service providers and institutions. It was founded in 2010 as a public-private partnership. BBS specializes in design, construction and operation of very high speed networks. BBS. Key Insight: Burundi has made significant progress in expanding its fiber optic infrastructure, reaching 45% coverage in urban regions, which supports faster internet access. The growth of internet users has increased steadily, with 38% of the population actively online, driven by mobile technology. As of January 2025, Burundi had about 1.5% of ~14 million people, leaving about 88-90% offline. Show me range to terrestrial fiber nodes on the map?

Is the ITU building in Geneva Switzerland within 10 km of a fibre node?

Start measuring on the map to see calculations here. Analyze network nodes within a 10 km radius using. 6Wresearch actively monitors the Burundi Fiber Optic Cables Market and publishes its comprehensive annual report, highlighting emerging trends, growth drivers, revenue analysis, and forecast outlook.
