

Byd distribution box

Overview

The BYD Battery-Box Premium LVS PDU Base (LVS-PDU) is the central power distribution unit required for building a BYD LVS low-voltage battery system. It forms the foundation of the modular LVS platform, enabling safe connection and operation of LVS battery modules. BYD has developed a battery storage line, which is suitable for any application. While the modular LV and HV solutions fit any residential application Backup and Off-Grid Off-grid applications and emergency power capability pose no problem for the Battery-Box. The high discharge capacity allows for. The flexible 48V premium storage unit with capacities from 4 up to 256 kWh 1 * BYD Battery-Box Premium LVS PDU - Sockel und Deckel (05-000319) 1 * BYD Battery-Box Premium LV BMU - IP55 (05-000317) 3 * BYD Battery Box Premium LVS - 4 kWh battery module (05-000318) BYD started in 1995 as a start-up. The BYD Battery-Box Premium LVS PDU (Power Distribution Unit) forms the brain and foundation of your Low Voltage (48V) energy storage system. Designed for maximum flexibility.
