

C650 optical module and C320

Overview

The C650 supports SMXA/1 and SMXA/3 optical line cards these are the same interface modules used in older ZTE models like the C300 and C320. ZXA10 C320 OLT (Z T E C320) is a compact, dense full-service xPON converged optical access platform for next-generation optical access networks, and it supports GPON/EPON/P2P/10GEPON/XG-PON1 common platform access, Z T E ZXA10 C320 supports HSI, VoIP, IPTV, CATV, mobile backhaul, WiFi and other. In the evolving landscape of Fiber-to-the-Home (FTTH), the ZTE ZXA10 C650 stands out as a critical mid-capacity member of ZTE's TITAN series. Designed for service providers who need a balance between massive port density and compact cabinet space, the C650 offers a future-proof path from GPON to. ZTE GPON-OLT-CLASS-C ++ is an SFP optical module applied to GPON OLT. It uses an LC optical interface. And fewer bureaus "network evolution and deployment requirements to enhance access capabilities and meet flat network requirements. 5DB, can. What are you looking for?

Find products, communicate with suppliers, and manage and pay for your orders with the Alibaba. Based on the TITAN platform, the ZTE ZXA10 C650 belongs to the ZXA10 C600 Series OLT (which also includes ZXA10 C600 and ZXA10 C620); it is a medium-capacity optical access OLT device featuring a 19" 6U-high shelf with 7 service slots and a backplane bus switching capacity of 6 Tbit/s, boasting. The OLT ZTE C650 is a reliable, scalable solution for GPON and EPON networks, supporting up to 32 ports and seamless integration with existing ZTE infrastructure when using compatible firmware and line cards.
