

Cable Splicing Box

Overview

Splice boxes, also known as fiber optic splice enclosures or fiber splice closures, are essential components in fiber optic networks. Their primary function is to protect and manage the spliced fiber optic cables, ensuring they remain secure, well-organized, and unaffected by. Splice boxes ensure continuously reliable real-time data transmission. With their compact and uniform design, the splice boxes for both the DIN rail and 19" mounting provide ample interior space for the secure connection of fiber optics. Distributor, design: Rail-mountable module, degree of. The FSB series of indoor wall mount enclosures are designed for centralized splice-only applications. These boxes are well suited as optical cable splice collection points for DAS (Distributed Antenna Systems), MTU (Multi-Tenant Unit) commercial business applications, and MDU (Multi-Dwelling Unit). A splice box (also known as splice distributor) is a housing in which fiber optic cables begin or end. High quality components ensure a secure and stable operation. Price and other details may vary based on product size and color.
