

Cable tray crossing line

Overview

The cable tray crossing is an essential fitting for secure and organised cable management systems. It enables precise horizontal crossings of up to four cable trays and ensures stable connections for power, data, and control cables. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned in this technical guide only apply to our own cable management ranges and cannot under any circumstances be transposed to silicone, overheating or. Cable tray crossing 200 x 60 mm Practical crossing for cable trays with a width of 200 mm and a height of 60 mm. - Simple connection using 2 screws on each side (optional)- Material: metal-. B manufactures its cable tray in a range of materials with a variety of finishes. The selection of material and finish is a function of the environment in which it is used in a wide range of environments, and easily formable (Appendices II and III).) putting wet utilities underneath makes them a lot easier to access and maintain. Our focus has always been on solutions from the field of cable support systems.
