

Cable tray flexible angle

Overview

The Flextray™ system is a flexible, field-adaptable way to manage cables throughout your project. The tray can be cut and bent to the needs of the installer on the jobsite, allowing cable runs to be adjusted as needed. The wide range of sizes offered makes Flextray a great choice for everything. Cable trays are open support systems designed for carrying and organizing cables and wires. The terms cable tray, cable ladder, and cable trunking are often used interchangeably, though they differ slightly in design. According to DIN EN 61537 (and equivalent IEC standards), cable support systems. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. Cable trays are produced in. Measure key dimensions of your cable or hose to find a carrier with the right width, length, and bend radius. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned in this technical guide only apply to our own cable management ranges and cannot under any circumstances be transposed to si osure, overheating or. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resil- for each of these installation challeng-ience and safety. es in the industrial environment.
