

# Costa Rica OEM Active Optical Device 100G

## Overview

100G QSFP28 CWDM4 is designed to operate over a single-mode fiber system using a 4X25 CWDM channel in 1310 band and links up to 2km. The module converts 4 input channels of 25Gb/s electrical data to 4 CWDM optical signals and multiplexes them into a single channel for 100Gb/s optical transmission. Biomerics is the largest and longest-operating CDMO in Costa Rica. Our two world-class campuses in Costa Rica are fully equipped with automation and all the vertically integrated technologies needed to produce market leading interventional devices. We manufacture a variety of plastic medical device. COMNEN's Customized 100G QSFP28 Active Optical Cable (AOC) is engineered to deliver high-speed, low-latency, and energy-efficient data transmission for modern data centers and high-performance computing environments. Utilizing QSFP28 transceivers on both ends, this AOC offers a seamless 100Gbps. ISO/IEC 27001 is an international standard for managing and processing information security. This standard is jointly developed by the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC).
