

Data Network Aggregation Switch 8 Ethernet Ports 4 Optical Ports

Overview

Developed for long distance fiber installations. Equipped with eight SFP+ ports, two additional SFP28 ports and one RJ45 console port for configuration. With AXIS D8308 Fiber Aggregation Switch you can connect multiple Axis devices using fiber midspans over long distances. It also enables easy. The Ethernet architecture and novel Fiber-to-the-Room (FTTR) deployment delivers 10G fiber-to-the-room access. 5G/5GBASE-T ports, ports 1 to 2 PoE/PoE+ supported, 2 x 1GE/10GE SFP+ uplink ports, rich. I have 2 poe switches and one addition switch along with the gateway. Any questions?

Our AI beta will help you find out quickly. It provides immediate network connectivity. operation against environmental disturbances, such as vibration and shock. With a switching capacity of 260 Gbps and a throughput of 193. Faster replacement and priority support, covered for 5 years.
