

Fiber Optic Cable Model Numbering Standard

Overview

The Telecommunications Industry Association's TIA-598-C Optical Fiber Cable Color Coding is an American National Standard that provides all necessary information for color-coding optical fiber cables in a uniform manner. Reading The Markings On Fiber Optic Cables Wisdom From The Street We found this cable laying in the gutter. What a find! A short length of Corning Rocket Ribbon 864 fiber cable left over from an installation by a contractor. We brought the cable back to our office with the intention of opening it. WolonFiber's 12-Color Fiber Optic Pigtail Packs are manufactured strictly to the TIA-598-C standard with vibrant, easy-to-identify colors. Perfect for fast, error-free termination in your ODF or splice closures. Available in OS2/OM3/OM4 at factory-direct wholesale pricing. It defines identification schemes for fibers, buffered fibers, fiber units. Note: due to OTDR measurement uncertainty KDP cannot guarantee attenuation values at fibres shorter than 1000m.
