

Fiber optic ODF pigtail

Overview

Fiber optic pigtails are cables with one end terminated with an optical connector, commonly used with fiber management equipment such as ODF, fiber splice closures, and fiber access terminals (FAT). Available in single mode and multimode, our fiber pigtails come in SC, LC, FC . A fiber optic pigtail is a short length of optical fiber—typically 0. The connector end is polished and tested under factory conditions, ensuring low insertion loss and high return loss. Unlike a patch cord—which has connectors on both ends—the bare fiber end of a pigtail is designed to be permanently spliced (either by fusion or. To connect fiber optic adapters in a fiber optic panel (for example a ODF T405 or a Multiflex) we use adapters, pigtails and patchcords from one of the world's largest manufacturers of fiber optic accessories. With high quality and with low damping.
