

Fuse-type distribution box

Overview

The Fuse Box is an older type of distribution panel that uses fuses instead of circuit breakers to protect electrical circuits. Each fuse is designed to blow when the current exceeds a certain limit, thereby cutting off the power to prevent damage. Plus, we'll sprinkle in some practical tips to make sure you're not. Are you looking for a compact, easy-to-install waterproof fuse and relay box?

The HWB60-AL Series Hard-Wired Waterproof Power Distribution Box with AssureLatch™ (PDM71009ZXM) is a great choice for protecting accessory circuits and overflow circuits from a main power distribution module (PDM). Today, electrical systems are essential for homes and industries. A distribution board (also known as panelboard, circuit breaker panel, breaker panel, circuit breaker, electric panel, fuse box or DB box) is a component of an electricity supply system that divides an electrical power feed into subsidiary circuits while providing a protective fuse or circuit. Electrical distribution boxes are used in commercial and residential buildings and are part of the electrical system, also known as switchboards. It integrates power distribution, protection, and monitoring capabilities, and is responsible for distributing power to entire commercial or residential. A fuse box uses a sacrificial wire that melts to stop power during an overload.
