

# Fusion Joint Box Fixing Bracket

## Overview

This is an Autodesk Fusion 360 Add-In for creating CNC friendly box/finger joints. The Box Joint appears as a single Feature in the Timeline. The joint will be automatically recomputed if any of the dependent bodies earlier in the Timeline. Corrosion resistant, tiny head nail for a concealed fixing Do you need a nail that has high corrosion resistance, come in a variety of sizes, and has a tiny round head that allows it to be used as a concealed. Now In Stock: Tyrolit ONE Cutting Discs at Fusion Fixings We are excited to announce. Autodesk Fusion tutorial on how to design a simple box joint jig that we can 3D print for your table saw. In this video we'll use parameters and a few functions to make sure our model works properly. This plugin is currently developed in Python; although, an even more experimental version is being tested in C++, for much better performance. Override ability for panel. What is the best way to attach the channel bracket to the two metal walls forming a 90 deg angle?

I've tried measuring the bracket and putting holes in the metal walls and joining the holes, which works but is very tedious and isn't a perfect match.
