

How much does it cost to connect an optical splitter and fiber optic line

Overview

00 per ft depending on terrain, access, and required precision for termination. Total ≈. Typical rates range from \$0. Total Project Costs: For commercial installations, expect costs ranging from \$5,000 to \$20,000 per mile for underground projects and from \$40,000 to \$60,000 per. Fiber optic cable installation costs between \$1,500 and \$7,000 for your home, with prices varying by cable length and installation method. The installation type you choose and the layout of your property determine the total labor and materials needed for your project. This guide presents ranges in USD and practical price estimates to help. Typically, per drop fiber cabling prices range from \$250 - \$1000 per drop depending on the type of fiber (OM2, OM3, OM4, or OM5), multi or single mode, PVC or plenum, average drop length, and also the number of fibers in each cable. Adding switches, high-end enclosures and other issues can also. These networks are constructed both underground and through aerial fiber, at an average cost of \$1,000 to \$1,250 per residential household passed or \$60,000 to \$80,000 per mile. Custom-built cables or niche specifications can lead to higher prices.
