

How to wire the feeder s electrical control box

Overview

Use the proper wire for the feeder circuit (3 AWG Copper THWN-2 for the Hot - Hot - Neutral, and 8 AWG for the Ground, shown here). Lay out the spools and tape the ends together. Power to the auger drive motor is done through feed pressure being applied to a diaphragm coupled to an electrical switch internal to the control unit housing. This switch in conjunction with a multi pole relay is used to control the auger drive. When there is an electrical connection between a work piece and the frame of wire feeder or the wire reel stand, a fire may be generated and cause damage by a fire if the wire contacts the frame or the work piece. Page 1 1/94 - ST-108 014-A OM-877 November 1995 Give this manual to the operator. For help, call your distributor or: MILLER Electric Mfg. Form: 108 026 414-734-9821 PRINTED IN USA. This contactor is typically controlled by a Time Switch or a. U-Grooved rolls for soft and soft shelled cored wires. Drive roll types may be mixed to suit particular requirements (example: V-Knurled roll in combination with U-Grooved).
