

Install surge protectors on cable trays

Overview

There are DIN rail solutions as well as products that can be installed directly downstream of the socket in the cable conduit. All SPDs have an earth-connection terminal point. For all other cases SPDs shall be fitted to protect against transient overvoltages, unless the owner of the installation declines such protection and wishes to accept the risk of damage to both wiring and equipment as tolerable. This will mean that any distribution board supplying electrical. maintain spacing or to keep cables in place when the tray is ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray cont d for instrumentation and control applications that require. Article Summary: A compliant cable tray installation requires a thorough understanding of NEC Article 392, proper structural support, and precise installation techniques. Before. The screw-on cable trays are available in perforated (MKS, SKS, DKS, EKS, IKS) and unperforated (MKSU, SKSU, EKSU) versions. The sys-tems include numerous connectors, fittings – such as bends, add-on tees, T and reducers, cross-overs and covers – and further accessories. com Published by: National Electrical Manufacturers Association 1300 North 17th Street, Suite 900 Rosslyn, Virginia 22209 www. org © 2020 National Electrical.
