

Kyrgyzstan franchise DAC high-speed cable 200G

Overview

The high speed cable assemblies meet and exceed 200 Gigabit Ethernet, InfiniBand EDR /HDR and temperature requirements for performance and reliability. The cables are compliant with SFF-8436 specifications and provide connectivity between devices using QSFP ports. It is suitable for data interconnection between ten gigabit switches within racks and adjacent racks to maximize the demand for high-density cabling interconnection systems in emerging data. Siemon's 200G (50G per lane) PAM4 Ethernet or InfiniBand™ QSFP56 passive and active copper cable DAC1 assemblies are designed to exceed industry standard performance offering a cost-effective, low latency, low-power option for high-speed data center network equipment direct connections. Purchase from nearby warehouses. OSFP 800G transceivers are compliant to the OSFP MSA, IEEE 802. QSFP56 uses P M4 signals for transmission, which doubles the rate. Copyright © 2025 Ascent Commun.
