

# MPO Optical Module Product Introduction

## Overview

Where it's used: Data center trunks, MPO-LC cassettes, parallel optics modules, high-density ODFs. Core counts: 12 and 24 are most common, but 16-fiber MPO is. MPO optical module refers to the optical module that interface uses MPO connector, which is usually used with MPO fiber patch cord. MPO connector can be divided into male head and female head. MPO interface of optical module is generally male head type, on the contrary, MPO fiber patch cord used to. If you only remember one thing: MPO is a multi-fiber connector standardized under IEC 61754-7 that allows you to terminate 8, 12, 16, 24, or even 32 fibers in a single rectangular ferrule. It enables precise alignment of multiple fibers (8, 12, 24, or more) within a single interface, significantly increasing cabling density compared to traditional single-fiber connectors. As. MTP (Multi-fiber Termination Push-on) and MPO (Multi-fiber Push-on) modules stand out as components that maximize the efficiency and scalability of fiber optic networks.
