

Modular cable routing frame

Overview

S frames are used to create modular cable sealing openings in cabinets, enclosures and structural penetrations carrying grouped cable routes. Up to 24 knockouts for cable glands ranging from M12 to M50, suitable for large cable volumes and high packaging densities. With our own factory, we will provide you with a low price. The KEL-FA range is a compact system to route and seal pre-terminated cables as well as conduits or pneumatic hoses utilising KT series grommets. Instead of individual solutions for each installation, standardized modules enable systematic, reproducible cable routing concepts that are easy for both installers as well as. CommScope's NG4access optical distribution frame (ODF) platform was built from the ground up to provide superior access to high density fiber terminations. With innovations such as CommScope's access trays, universal adapter packs, cabled modules and MPO modules, installing and maintaining large. Roptec Transit Designer™ is your shortcut to safety and efficiency.
