

# Modular energy storage cabinet 100kWh for avionics applications

## Overview

Housed in a weather-resistant IP55 cabinet, it combines a 100kWh LiFePO<sub>4</sub> battery pack with 50kW charge/discharge capability, supporting real-time monitoring and remote control via Ethernet, RS485, or CAN. The UESS-CAB 50-100F is an all-in-one outdoor energy storage cabinet designed for factories, data centers, mining sites, cold-chain warehouses, and microgrids. With 50-100kWh LiFePO<sub>4</sub> capacity and 50kW output power, it delivers stable, safe, and efficient energy for critical operations. The system integrates lithium battery modules, BMS, EMS, high-voltage distribution and protection, fire safety, air-cooled thermal. The modular energy storage integrated cabinet can achieve efficient and safe design of building blocks from 100 KWH small energy storage unit to MWH large-scale energy storage power station, solving the industry common problems such as low system safety, high parallel loss rate, short system life. 50kW/100kWh INSPUR-ESS-L100 Energy Storage Cabinet is a high-performance integrated energy storage system. This product incorporates advanced battery technology, high-efficiency power conversion systems, and intelligent management systems to optimize energy utilization efficiency. We provide customized solutions tailored to your specific requirements. Join us as a distributor! Sell locally — Contact.
