

Optical Module with 1000Mbps Adaptive Speed

Overview

► What is a 1000BASE-SX SFP Module?

A 1000BASE-SX SFP (Small Form-factor Pluggable) is a hot-swappable, compact optical module designed for Gigabit Ethernet (1000Mbps) communication. The "SX" designation signifies its use with short-wavelength (850nm) lasers over multimode fiber. to 100 meters reach over unshielded twisted-pair category 5 cables. The module supports 1000 Mbps (or 10/100/1000Mbps) full duplex data-links with 5-level Pulse Amplitude Modulation (PAM) signals. All four pairs in the cable are used with symbol rate at 250Mbps on each pair. Understanding its specifications, capabilities, and optimal deployment scenarios is crucial for network engineers and IT. Power Consumption 1W Allowing for Prolonged Service Life Use the Compatibility Tool to verify FS transceiver compatibility with your device and access test reports. A 5 dB optical attenuator should be inserted between the fiber-optic cable and the receiving port on the SFP at each end of the link. Part numbers: 10060, 10060H The dual-speed 100LX/1000LX SFP and industrial 100LX/1000LX SFP modules operate at either 100 Mbps or 1000 Mbps over SMF links up to 10 km long. Operating at 100 Mbps, these dual-speed SFPs conform to the 100BASE-LX standard. 3z 1000Base-LX standards, TL-MC101 is designed for use with single-mode fiber cable utilizing the SC-Type connector.
