

Papua New Guinea DAC High-Speed Cable 800G

Overview

800G OSFP DAC (Passive Direct Attach Copper) enables high-bandwidth 800G links and supports 800G Ethernet rate. It provides an OSFP copper direct-attach solution. This cable is compliant with OSFP MSA (Multi-Source Agreement), IEEE 802.3ck and 400GBase-CR4 standards. Purchase from nearby warehouses. In AI clusters, high-performance computing (HPC), and next-generation cloud data center architectures, 800G ports are gradually becoming the mainstream configuration. Faced with high-density, high-speed network environments, the choice of short-distance interconnect solutions directly impacts. The Volex DAC cable product family includes cable assemblies with Small Form-factor Pluggable (SFP), Quad Small Form-factor Pluggable (QSFP), and Octal Small Form-factor Pluggable (OSFP) single and double density modules. Compatible with common 800G form factors (OSFP and QSFP-DD800), our cables are factory-tested and supplied with EEPROM programming and electrical test reports.
