

Reseller Access Switch 100G

Overview

With improved data forwarding capabilities, it can be flexibly deployed and supports access of 100G servers. It can evolve to 100GE/400GE data centers. With RDMA enabled, communication data on the RG-S6580-48CQ8QC does not need to be handled by the CPU. 8 Global warehouse Currency: USD USD - US Dollar EUR - Euro JPY - Japanese Yen KRW - Korean Won English Contact Us Products Categories NVIDIA. The ETS-1-100G Ethernet switch is a high-performance device that can be used as aggregation or transport switch in carrier networks and as a top-of-rack or end-of-row switch for data centers. 4Tbps, the ETS-1-100G's non-blocking architecture guarantees lossless packet forwarding. The UfiSpace S9110-32X is a high-performance data center switch with 32 x 100G QSFP28 ports, Broadcom Trident3-X7 silicon, and an Intel Denverton 4-core processor. It offers efficient Ethernet connectivity, intelligent features, and reduced maintenance costs in a 1RU form factor., in response to the explosive growth of data, the sacred switch supports the latest data streaming architecture and control protocols SND5320 implements 32 QSFP28 100 GbE ports in the 1RU chassis. FS 100 Gigabit data centre switches with build-in broadcom switch chip provides powerful hardware switching capacity and data centre features (supporting stacking, MLAG, PFC, ECN, VxLAN, EVPN, REUP, etc), making them ideal for cloud data centre and high-end campus network.
