

# South Asia OEM Access Switch 1G

## Overview

S5710-28SX is a 24-port 1G SFP port switch with 4\*10G SFP+ uplinks and 4\* 1G COMBO port, providing high-performance, secure connectivity for enterprise networks with energy-efficient design and advanced management. The 1G series also excel as management switches, with PoE models supporting up to 90W. These full line-rate L2/L3 access switches provide. Provides OEM / ODM for project-based development in quick time, customized and differentiated HW/SW spec, with high-quality and cost-effective. The S5710-28SX is built for high-noise immunity and long-distance connectivity. Learn how FS 1Gb & 2. What's the Difference Between a Data Center Server and a Data Center Switch?
