

The horizontal bar in the middle of the cable tray

Overview

The lacer bar can be mounted vertically or, to be used for reducing cable strain, it can be mounted horizontally as a cable tray. The horizontal telescoping lacer bar can be mounted to rackrail brackets or to the inside flange of the rackrail itself. Properly. For ease of installation and accessibility, lay cable and hose in trays instead of pulling it through conduit or raceway. These tray systems allow excellent ventilation and prevent sagging while routing. The LBP-2A, LBP-4A and LBP-6A have a 2", 4" and 6" offset, respectively. Choose the appropriate offset bar based on the distance from the rear of equipment to the rackrail. Think of it as a sophisticated "highway" for cables, keeping them organized, protected, and easily accessible. Cable ladder systems and cable tray systems shall be manufactured in accordance with BS EN 61537, channel support. Is the percent fill of a vertical tray the same as a horizontal cable tray?

(1) It is common practice to use cable trays in the vertical position. Cables must be fastened securely, see NEC 318-8 (b). (2) Yes, they do maintain their.
