

Unable to find electrical distribution box in France

Overview

If your property does not currently have an electricity supply you will need to make application for such a supply to EDF (Edenis). The request for a supply is called a demande de raccordement, which can be made by letter or on-line at Demande de prestation liée au raccordement. Getting electricity in a new home in France requires three steps: an Enedis network connection (2-6 months, typically €400-€1,685 TTC), a CONSUEL compliance certificate (~€145 TTC), and an electricity supplier contract. Once the line is in place, activating supply with a Linky meter costs €1. The electricity supply authority EDF (Electricite de France) will provide a meter, fuses and a main current operated circuit breaker. In both cases 2 & 3 you need to approach ENEDIS to get a price to create a new permanent electrical supply (“branchement définitif”) for the property. Whatever your immediate approach to get power is I strongly advise that you get this sorted sooner rather than later as you will then know what you. Electricity is widely supplied by the national provider, EDF (Électricité de France). Single pole and 2-pole switches are shown along with features of the e.
