

Ventilation Intake Fan Electrical Distribution Box

Overview

Custom ventilated electrical boxes and control cabinets with louvers, fan filters, rain hoods, and cable entry designs for heat dissipation in industrial electrical systems. They house sensitive components such as PLCs, variable frequency drives (VFDs), contactors, relays, and communication equipment. All of these devices generate heat during operation. Our ventilated electrical enclosures are designed to house and protect electrical components in environments where heat. Choose from our selection of enclosure fans, including DC equipment-cooling fans, wet-location enclosure-cooling fans, and more. All ventilation fan systems should contain an intake and an exhaust variable, which can be fans or ventilation holes. By removing warm internal air and introducing cooler ambient air, these products help regulate internal temperatures, reduce thermal. We specialize in creating custom NEMA enclosures tailored to your exact needs.
