In this figure, you can find a Core Switch and two Access switches connected to it. diagnose switch-controller mac-cache show <switch-id> In the FortiGate GUI. LTESniffer is An Open-source LTE Downlink/Uplink Eavesdropper It first decodes the Physical Downlink Control Channel (PDCCH) to obtain the Downlink Control Informations (DCIs) and Radio Network Temporary Identifiers (RNTIs) of all active users. Using decoded DCIs and RNTIs, LTESniffer further. Is there a way I can find the list of IP addresses connected to a switch (may be Unix command), so that I can visit each desk, run a command, and check all the active IP addresses (computers) connected to that switch, and based on that I can find out to which switch that specific IP address is. If you select multiple ports, the configuration page displays the Port Configuration, Networks, and Port Profiles tiles with the settings applied to the selected ports. You can make configuration adjustments to the ports from these tiles.
