

Wall-mounted fiber optic fusion splicing equipment

Overview

Fusion splicer enable splicing of Fiber Optic Cable with low loss and high reliability. For fusion splicer, we offer two types: Core alignment fusion splicer, which bring high performance and functionality, and Cladding alignment fusion splicer, which are superior. They are designed to provide a transition point between high-fiber count outside plant (OSP) and inside plant (ISP) cables as well as a distribution point for distributing a single high-fiber count cable to be spliced to several lower count cables. The wall-mountable housing is designed to store the optical fibers being spliced within the tray and can accommodate either 16 0. To create splices with high optical quality and mechanical strength, these tools perform a series of tasks, including stripping, cleaning, cleaving, splicing, recoating, and. Amazon. (LC OM1 NO Pigtailed) : Electronics Fiber Optic Wall Mount or Pole Mount Enclosure for Indoor or Outdoor Fiber Optic Terminations and Fusion Splice. The fiber optic splice enclosure shall house, organize, manage and protect cable to cable fusion splice connections. It shall accommodate medium to large count fiber optic cables typically coming in from outside of the building transitioning to often smaller count cables within the data center.
