

What are the specifications of the elevator electrical distribution box

Overview

This box consists of inner components of a neutral and earth connection busbar, plus three-phase terminals. Eaton's Elevator Control panelboards provide electric power distribution with integrated fusible switches, metering, and surge protection. The Mitsubishi Elevator Power Box X59LX-81 is a foundational energy distribution component exclusively engineered for Mitsubishi elevator systems—essential for commercial high-rises, residential complexes, public transit facilities, and office buildings worldwide. As the “central power hub” for. These cabinets house the equipment and wiring that control the flow of electricity from its source to the various outlets and devices in a facility. While using drawout switchgear with power air circuit breakers remains a highly reliable solution, requests for drawout molded case circuit breakers (MCCBs) have increased.
