

What size wireless router should I use if I have a 100Mbps fiber optic connection at home

Overview

For fiber optic internet speeds of 100 Mbps or higher, a router supporting at least 1 Gbps is required. Look for routers with AX or AC designations (Wi-Fi 5 or 6) that support faster speeds than older N standards (Wi-Fi 4). Let's delve into the best WiFi routers suited for unleashing the full potential of your 100 Mbps connection. Source: Amazon Best Security: NETGEAR Nighthawk Modem Router Combo C7000 Pros: Cons: The NETGEAR C7000-100NAS stands out by combining a cable modem and WiFi router into one device, offering. Popular internet service providers (ISPs) such as Cox, Spectrum, Xfinity, and fiber-optic providers like AT&T offer faster Internet speeds for expansive home WiFi networks. Range. The two main ways to set up such a network are by connecting these additional access points to your main router with a cable or wirelessly, also known as wired or wireless backhaul. It has plenty of power and shares some of the networking features typically available in high-end.
